

MERRITT 88

A unique skybridge design from a world-famous boatbuilder

CAPT. KARL ANDERSON

With a very successful run of S6-footers, Roy Merritt of Merritt's Boat & Engine Works in Pompano Beach, Florida, thought it was time for a refresh and a few updates for which he is well-known. Utilizing the hull mold for the S6, lengthening it a little over 2 feet, and adjusting the house and cockpit, it's amazing what seems like slight additions can do to the boat.
